## Residential Re-Roof - Cool Roof Alternatives

The roofing contractor noted below will not be installing a cool roof, as per the 2008 California Energy Code, Subchapter 9, Section 152(b)H: and has elected to install one of the following approved alternatives:

(check the alternative which will be installed and provide additional information as noted)

- 1. The roof area being replaced does not exceed 50 percent of the total roof area or more than 1,000 square feet in total.
- 2. Existing ducts in the attic are insulated and sealed according to Section 151(f)10, (R-6 insulation). Provide signed documentation to confirm this requirement.
- 3. Building has at least R-38 ceiling insulation. Provide an insulation certificate stating the type, thickness, and R value of the installed insulation.
- 4. Building has a radiant barrier in the attic meeting the requirements of Section 151(f)2. Provide a detail drawing showing how the radiant barrier is installed.
- 5. Building has no ducts in the attic.

Name: \_\_\_\_\_ License # (if applicable): \_\_\_\_\_

\_\_\_\_\_  
(Authorized Signature) Date: \_\_\_\_\_

**City of El Centro  
Building and Safety/Code Enforcement Division**

**Smoke Detector and Carbon Monoxide  
Self Certification**

*This Certification is to be filled out by the Permittee*

Project Address: \_\_\_\_\_

**I, the undersigned, hereby certify that I am the permittee of the project. I further certify that smoke alarms and carbon monoxide alarms are present and tested to be functional in all the following locations:**

California Residential Code (CRC) Section R314.1, CRC R315.2 states in part that existing dwellings be “retrofitted with smoke detectors and carbon monoxide detectors when a building permit is issued for, work or repairs to a building that is valued at \$1,000 or more.” CRC Section R314.3, CRC R315.3 defines required locations.

***Both boxes below must be checked.***

- Carbon Monoxide Alarm: On the ceiling or wall outside of each separate sleeping area in the immediate vicinity of the bedrooms or in each hallway outside of the rooms, and each level of the dwelling.
- Smoke Alarms: Installed in each room used for sleeping purposes, outside each sleeping area, and on each level of the dwelling unit.

***Retrofitted detectors may be battery operated. Multiple-purpose alarms (Carbon monoxide and smoke alarms) shall comply with all applicable standards, and requirements for listing and approval by the State Fire Marshall.***
